| Bc. | 2004 | Faculty of Natural Sciences of the Comenius University, Department of Regional geography, planning and environment, Bratislava |

Research

I am a human geographer with interest in the areas of urban geography, politics of urban transformation and post-socialist transition. My research has been examining the relations and agency of various actors in urban politics. More specifically, I have been exploring conditions affecting actions of informal groups and NGOs and their position within urban governance in the city of Bratislava.
