

ANNOUNCEMENT

THE MILLENNIUM WORLD CONGRESS ON VACCINES AND IMMUNIZATION, AUGUST 29 – SEPTEMBER 3, 2000, LIEGE, BELGIUM

The University of Liege, Belgium and the University of Montreal, Canada, announce the Millennium World Congress on Vaccines and Immunization, which will be held on August 29 – September 3, 2000, in Liege, Belgium. After a very successful first Congress in Istanbul, in 1998, the Millennium (the second) Congress is organized to discuss problems of development of new vaccines using modern technologies and immunization strategies to prevent and control infections and other diseases of importance for human and veterinary medicines. All specialists working in this field, in academic, industrial, and governmental research institutions and international organizations are invited to present their latest results of investigations in 4 plenary sessions, 5 symposia, 16 workshops and daily poster exhibitions.

Registration fees: 380 USD before March 30, 2000, and 480 USD before August 15, 2000, for participants; 160 USD for accompanying persons.

Information: Prof. Dr. Edouard Kurstak, Montreal, Canada; fax: +1 - 514 - 695 0514;

ERRATUM

In the article „*Investigation of the relationship between Epstein-Barr virus and ordinary gastric carcinoma using the nested polymerase chain reaction*“ by R. Durmaz, A. Aydin, M. Köroglu, B. Durmaz and H. Ciralik, which appeared in *Acta virologica* **42**, 359–363 (1998), the figure lacked its number, title and legend. The figure on page 362 should read as follows:

Fig. 1

Gel electrophoresis of products of the one-stage (a) and nested PCR assays (b, c)

Common (a), EBV-1-specific (b) and EBV-2-specific (c) primer pairs were used. Ordinary gastric carcinoma (lanes 1–5), non-neoplastic tissue (lane 6), nasopharyngeal carcinoma (lane 7), and DNA size marker (lane M).
