# EuroNanoForum 2007

Nanotechnology in Industrial Applications  
June 19 - 21, 2007, CCD Düsseldorf, Germany

The **EuroNanoForum 2007** will be organised as a three-day conference within the framework of the German presidency. The conference will be established as the foremost European congress for nanotechnology-transfer from research into industrial production processes, products and applications. It brings together excellent scientists with leading researchers and managers from industry.

The **EuroNanoForum 2007**  
will be held at the  
**Congress Center Düsseldorf,**  
**Germany,**  
**June 19 - 21, 2007**

The excellent **conference programme** with international top speakers will present the current state of nanotechnology for industrial applications and open up new perspectives for Europe.

## List of topics:

- standardisation in the field of nanotechnology
- measurement technology for quality assurance
- nanotechnology in social perception
- social acceptance
  - nanosafety, toxicology, explosion protection
  - health and environmental aspects
- nanoproduction und process technology
  - production and modification of nano materials in industrial dimensions
  - new functionalities by nanotechnologies (e. g. surface technologies)
  - analytical methods for handling of nanomaterials and
  - products in industrial processes
- nanomaterials in industrial applications
- nanotechnology in electronics
- nanotechnology for optical applications
- nanotechnology in textile industry
- nanotechnology in life sciences and medicine
- nanotechnology for new energy managements
- future applications and new ideas

Contributed papers for oral or poster presentation for the conference are most welcome and can be submitted online. The conference will be accompanied by a special **industrial exhibition** presenting European key players in nanotechnology. For further information about the conference and exhibition please check **[www.euronanoforum2007.eu](http://www.euronanoforum2007.eu)**.
