

## Training Courses for PhD Students

Extending offer

**OCTOBER 2022**

### INTRODUCTION TO THE BUSINESS WORLD

**When:** October 18, 9.00 - 12.00

**Where:** Slovak University of Technology, Bratislava

**Trainer:** Andrej Takáč, Slovak University of Technology

**Registration:** [Registration link](#)

The main goal of this workshop is to provide young researchers with an insight into the business world and how science can come closer to it, with focus on the Life Sciences sector. The workshop will offer a combination of presentations, case study group work and expert talks followed by discussion.

### LEADERSHIP FOR YOUNG RESEARCHERS

**When:** October 20, 9.00 – 15.00

**Where:** Online

**Trainer:** Dušan Ondrušek, PDCS

**Registration:** [Registration link](#)

The training will cover various contemporary approaches to leadership (transitional, transactional, facilitative, "followership", etc.). Trainers will focus on communication and soft skills during the training and participants will get an opportunity to discuss, exercise, and experiment during workshops, games, exercises. We will see whether an introvert scientist can be a good leader and what s/he needs to know to be one. Besides, we will spend some time discussing on how science can have bigger impact, how to "bring the science out of the lab".

### CREATIVITY PROCESSES

**When:** October 26, 9:00 -12:00

**Where:** online

**Trainer:** Natália Feriančeková, Slovak Academy of Sciences

**Registration:** [Registration link](#)

This course shall introduce different ways of thinking included in the creative process and basic brainstorming methods. Participants will learn how to use design thinking in their project and what is innovation challenge work.

## IP LAW & LEGAL REGULATORIES: INTRODUCTION

**When:** October 26, 13.00 – 15.30

**Where:** Online

**Trainer:** Martin Gróf, Slovak Academy of Sciences

**Registration:** [Registration link](#)

The aim of the course is to introduce PhD students to basics of IP law and related legal regulatories. The course will be divided into four parts: IP law, Regulations at institutional levels, Patenting of medical and biotech inventions and Realization of joint and contract research (with focus on IP).
