PROJECTS

[30/11/2024 - Current]

Monetary Policy Transmission in the Euro Area: The Role of Financial Imbalances

- Funded by a national grant agency, the Slovak Research and Development Agency.

- Role: Researcher.
- The primary objective is to explore the effect of financial imbalances on the transmission of monetary policy in the eurozone, using a self-constructed financial cycle indicator as a comprehensive measure of financial imbalances.

[30/11/2023 - Current]

Modelling of accumulation of risks and imbalances in the financial sector

- Supported by VEGA, Scientific Grant Agency of the Ministry of Education, Science, Research and Sport of the Slovak Republic.
- Role: Principal investigator.
- The main goal is to contribute to the current state of modelling of risks and imbalances in the financial market, in particular in the credit market. Identifying expansionary phases and indicators that could predict accumulation of risks and imbalances is important from the perspective of economic and monetary policy makers. The intention is to develop models that can predict expansionary phase of the financial cycle and thus signal potential disruptions to financial stability.

[30/11/2022 - Current]

Financial cycle: design, modelling and forecasting within machine learning framework

- Funded by a national grant agency, the Slovak Research and Development Agency.
- Role: Researcher.
- The main objective of the proposed applied research project is to propose new financial cycle indicators that will be used to monitor and predict future risks for financial stability in Slovakia. Our solution will provide the beneficiary with several new financial cycle indicators, prediction models based on machine learning and estimates of the most important factors influencing the future development of the financial cycle. The proposed solution should provide a decision support system that is both beneficial for the financial sector but also has the ambition to contribute to the debate on future macroprudential policy measures.

[30/11/2021 - Current]

Applying machine learning methods to support labour market policy making

- Funded by a national grant agency, the Slovak Research and Development Agency.
- Role: Researcher.
- The main aim is to explore data applications of machine learning techniques in the impact evaluation of active labor market policies using administrative data of registered job seekers and in online job search data analysis.
- Internship at the analytical unit of the Ministry of Finance, Institute of Financial Policy in 2024. The goal was to evaluate publicly funded reskilling courses for employed people in Slovakia.

[2022 - Current]

COST CA21163 - Text, functional and other high-dimensional data in econometrics: New models, methods, applications (HiTEc)

- HiTEc integrates cutting-edge analytic developments involving innovative sources of information, such as text, functions, perceptions or imprecise data, in econometrics. An international network of experts, spanning the disciplines of econometrics, mathematics, statistics and computer science, is created, to establish and implement new efficient inferential procedures for using such information in econometric modelling and forecasting.
- Supported by COST (European Cooperation in Science and Technology), a funding organisation for research and innovation networks.

[2024 - 2025]

OECD project on evaluating active labour market policies in Slovenia

[01/07/2024 - 31/12/2025]

PostdokGrant

- Grant of the Slovak Academy of Sciences (SAS) aiming to financially support high quality project proposals of early career researchers employed at the SAS institutes.
- Topic: Use of new machine learning methods in modelling different aspects of the labour market.

[2024 - 2025]

On empirics of illicit capital flows network

- Project Based Personnel Exchange programme between the Institute of Economic Research and Zeppelin University.
- The primary objective of this project is to establish and further deepen the international cooperation between Slovak and German teams at both, the individual basis as well as institutional level.
- Role: Preparation of the empirical model aimed at testing the effect of estimated illicit financial flows on prices of real estate properties.

[10/2021 - 10/2025]

COST CA20112 - PlatfoRm OF policy Evaluation community for improvED EU policies and Better ACKnowledgement (PROFEEDBACK)

- The Action PROFEEDBACK aims to foster the networking of the policy evaluation community at EU-level, raise awareness on the importance of evaluation policy research and improve its impact on policy-making. The Platform, following a bottom-up and open approach, gathers researchers and

professionals from various scientific fields and sectors to present and evaluate theories, topics, tools and methods of policy evaluation. Results of the Europe-wide assessment of good practices will provide direct and high-quality inputs for national and EU bodies responsible for policy evaluation.

- Supported by COST (European Cooperation in Science and Technology), a funding organisation for research and innovation networks.

[2021 - 2025] **Follow the Money - Deciphering the Link between Shadow Banking Sector and the Illicit Financial Flows**

- The main objective of this project is to create a comprehensive framework enabling examination of the involvement of shadow banking sector in facilitating the IFFs. Additionally, the project aims to investigate possible consequences of such 'coupling' on domestic and international financial system, being it shortterm impact during periods of financial stress or long-term effect on overall financial development.
- Funded by a national grant agency, Slovak Research and Development Agency.

[2021 - 2024] **INTERCEPT - motivating mobilizing supporting NEETS green Career Pathway**

- Research on NEETS (people Not in Education, Employment or Training) and green companies, identifying needs and opportunities in this area: it will select 300 NEETS aged 25-29 in Italy, Malta and Lithuania, train and enroll them in 3-month paid internships in green businesses.
- My role: counterfactual impact evaluation of the intervention on Maltese participants.
- INTERCEPT benefited from a € 2.18M grant from Iceland, Liechtenstein and Norway through the EEA and Norway Grants Fund for Youth Employment.

[2021 - 2023] **Micro macro modeling in Slovak conditions**

- The main goal is further development, interconnection and application of existing models developed at the Institute of Economic Research of the Slovak Academy of Sciences. By combining different types of models, we can get a more comprehensive picture of functioning and relations in the economy and the labour market. The partial goal of the project is to make applications of models able to address current and future challenges of economic policy, such as the impact of COVID19 on economy and labour market, or the effects of automatisations in various sectors of the economy. Write here the description.
- Supported by VEGA, Scientific Grant Agency of the Ministry of Education, Science, Research and Sport of the Slovak Republic.

[2021 - 2021] **DISKOW - Discovering job Knowledge through Web Analytics towards facilitated mobility of European Professionals and Refugees Career Integration**

- The main goal was to create a Job Knowledge Base to discover relevant career and job knowledge from the web and make it easily accessible using a standardized format and terminology.
- With the support of the Erasmus+ Programme of the European Union.
